

## The Stealth LASER 5000

3CH White Noise Generator with Centralized Control Function  
Prevent LASER Eavesdropping Via Windows

### Laser Eavesdropping Doesn't Just Happen in Movies

- There's no way to know if they're eavesdropping
- It proceeds stealthily within visibility
- The best way to protect the windows

### Prevent Eavesdropping by Creating Noise in the Windows

- Stick the transducers to the window
- Make white noise indoors

### Centralized Control for Optimal Management

- Each device is connected by Ethernet in a building
- The PC's program controls each devices individually
- Each device can also be controlled by remote controller

LA5000 with Transducers

Ethernet

### Control S/W Windows PC

- On/Off Control
- Volume Control
- Status Monitoring

### Specifications

- Frequency response: 50 Hz - 15 kHz
- Output: 10 Vpp (3\*10W)
- Min. impedance of load: 3 Ohm
- Equalizer: LF: 180Hz +-12dB, HF: 3KHz +-12dB
- Port: 10/100 Base-T Ethernet (8pin RJ45)
- Output adjustment: 100 step
- Size: 50\*70\*243mm
- Weight: 1.5Kg
- Power Supply: 100-240VAC / 19VDC 2A
